

North Fullerton Surgery Center

Insurance and Billing:

The Center is a free standing, physician owned ambulatory surgery center. Physicians who will be performing your procedure may be an owner in the Center supported by other providers. All our providers and staff are committed to delivery of quality patient care.

If your insurance carrier is not one of the companies below, payment for your procedure will fall under the out-of-network benefit of your policy. Our Center is dedicated to providing consumers as much information as possible regarding their potential healthcare costs.

It is important you contact your insurance company prior to receiving services. Each plan design is different and provides various levels of coverage that can make a difference in your out-of-pocket costs.

We can provide or recommend the following prior to you receiving services at our Center:

- Upon request, our standard charges are made available to the public

- Plans the Center is currently participating with as In-Network:
 - Horizon Blue Cross Blue Shield of NJ (including Omnia Tier 1)
 - United Healthcare
 - Oxford Health
 - Medicare

- In addition, the physicians who provide care within our Center might not participate in the same insurance plans as the Center. You should check with the physician who is arranging your healthcare services to see which insurance plans the physician participate. The physician's professional fees are not included in the Center's facility fee. As such, you should contact the physician's office to determine your specific financial obligations for the services they will provide.

- Patients should directly contact their health insurance carrier to determine their specific financial obligation related to their specific treatment or services.

Other Care Providers:

We have other providers who may deliver services during your stay at our Center. In addition, to the bill from the Center and physician, you may receive a bill from another provider depending on the nature of your procedure.
